

EduConnect: Intelligent Student Success & Alumni Engagement Platform

Phase 7: Integration Services & REST APIs

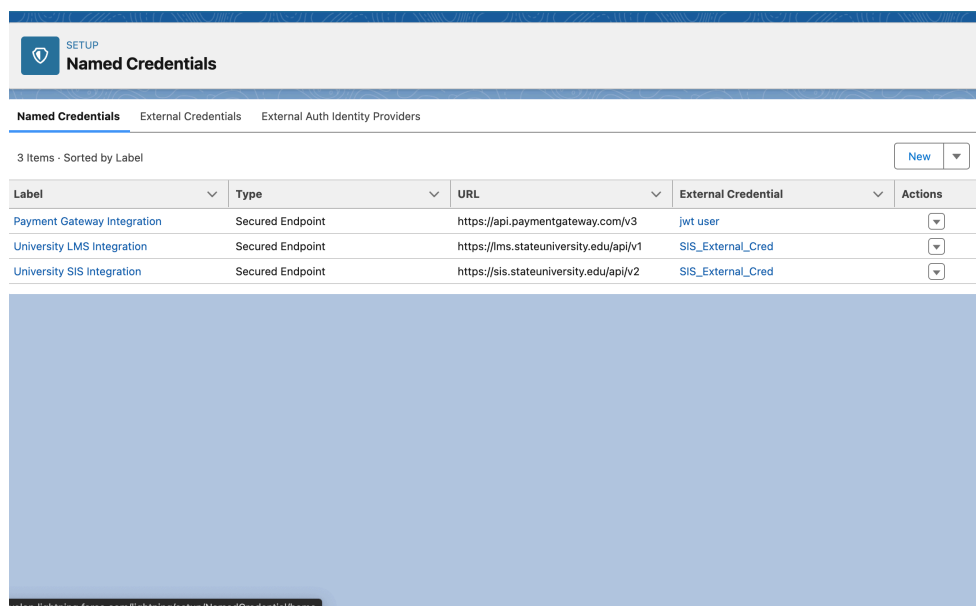

Overview

Phase 7 focused on creating comprehensive integration services that connect EduConnect with external systems through REST APIs, web services, and real-time data synchronization. This phase enables seamless data flow between the student success platform and institutional systems like SIS, LMS, and third-party analytics tools.

Objectives

- Develop REST API endpoints for external system integration
- Implement secure authentication and authorization for APIs
- Create bidirectional data synchronization services
- Establish real-time notification systems
- Build integration monitoring and error handling
- Enable webhook support for event-driven integrations
